IVF\_ICSI\Einverständniserklärung IVF ICSI Englisch 20.04.2016.doc

### Declaration of consent

Patient

Patient

IVF

We hereby give our consent to the office of Dr. Jürgen Krieg MD/Gynecologist that the In-Vitro Fertilization (IVF) procedure be performed. We have been thoroughly informed and are aware of the possible risks of the IVF procedure (internal injuries, bleeding, infections hyper-stimulation of the ovaries, hormonal stimulation's causing water/fluid retention). A blood test from two of hepatitis B, hepatitis C and HIV must be made in the period of 2 years.

ICSI

We hereby give our consent that the Intracytoplasmic Sperm Injection (ICSI) procedure, in addition to the IVF procedure, be performed. We have been thoroughly informed and are aware of the possible complications of the ICSI procedure. A blood test from two of hepatitis B, hepatitis C and HIV must be made in the period of 2 years.

Embryotransfer

We hereby give our consent for the transfer of the embryonic cells. We have been informed and acknowledge the frequencies and risks of multiple birth pregnancies.

Please fill in the desired number of embryonic cells you would like to have transferred.

Cryopreservation

Yes

No

We have been informed of the possibilities and chances of the Cryopreservation for the supernumerary fertilized oocytes at the pronuclear stage. If possible the surplus of oocytes at the pronuclear stage should be Cryopreserved.

Thawing of Cryo sperm

Yes

No

We consent to the thawing of the Cryopreserved sperm cells for the artificial fertilization(s) in the current cycle. We have been informed and accept that the consent of both partners is needed. This consent must be agreed to and signed by both partners before the thawing of the frozen sperm cells.

Thawing of Cryo oocytes

Yes

No

We consent to the thawing of the Cryopreserved oocytes for the transfer in the current cycle. We have been informed and accept that the consent of both partners is needed. This consent must be agreed to and signed by both partners before the thawing of the frozen oocytes.

Embryoscope®

Yes

No

We consent to the intensified supervision of the oocytes division with the help on a Embryoscope®. We have been informed and accept the additional charges for the Embryoscope®. We understand that the procedure must be paid for at the cost of the patients and is not covered by health insurance.

Assisted Hatching

Yes

No

We consent to the microscopically controlled laser application on the embryonic membrane layers of protein (zona pellucida). We have been informed and accept the additional charges for the assisted hatching. We understand that the procedure must be paid for at the cost of the patients and is not covered by health insurance.

UTM

Yes

No

UTM contains a substance called hyaluronic acid, which is added to the nutrient medium before the embryo transfer. The ability of the embryo to connect to the womb wall is supposed to be raised, however, it has no influence on the development of the embryo.

We acknowledge and agree to the anonymous/pseudonymous statistical evaluation of the treatments and procedures. We acknowledge and agree to the fact that in the case of a pregnancy, birth, and medical conditions of our child, the medical data will be passed on from the above mentioned doctor's office to the office(s) of the current attending doctor(s).
